that was disturbed, but it gave oc-casion for a mighty amount of speech making.

THE REVISED BIBLE.

The Anglo-American Bible Revis on movement now in progress is the first inter-national and inter-denominational effort in the history of the translation of the Bible. The leased to know the whereabouts of present and the older authorized versions for public use in churches proceeded from the undivided naional Church of England, before the other evangelical denominations were organized, and before the American people had an independ-

ent existence. The new revision took its origin, very properly, in the Convocation of Canterbury (the cradle of Anglo-Saxon Christendom), May 6, 1870, by the appointment of a committee of eminent biblical scholars and dignitaries of the Church of England. with power to revise, for public use. the authorized English version of 1611, and to associate with them representative biblical scholars of other Christian denominations using that

The English committee is divided into two companies, one for the Old Testament and one for the New. The American committee was or ganized in 1871, by invitation, and with the approval of the British revisers, and hegan active work in ploration in search of mineral October, 1872. It is likewise selected from different denominations, and divided into two companies. The American Bible Society has no part or responsibility in this enterprise, and can have none within the limits of its present constitution.

The British and American com mittees are virtually one organization, with the same principles and objects, and in constant correspondence with each other. They do not intend to issue two separate and distinet revisions, but one and the same revision for both countries. COMPOSITION. The two committees embrace at

present 79 active members, 52 in

England and 27 in America. Besides, the English committee lost by death and resignation 15, the American committee 7 members, Adding these, the whole number of scholars who at any time have been connected with this work, amounts to 101. Among these are many of the best Biblical scholars and commentators of the leading Protestant denominations in Great Britain and the United States. Not a few of them are well known by their works in Europe and America. The American members are nearly all professors of Hebrew or Greek exegesis in the principal theological institutions of the Eastern States and have been selected with regard to competency and reputation for Biblical scholarship, denominational connection and local convenience or easy reach of New York, where they

met every month. The object of this Anglo-Amercan enterprise is to adapt King James' version to the present state of the English language, Without hanging the idiom and vocabulary and to the present standard of Biblical scholarship, which has made very great advances since 1611, especially during the last thirty years, n textual criticism, Greek and Hebrew philology, in Biblical geography and archaelogy,

It is not the intention to thenish and would not succeed), but a conservative revision of the received version, so deservedly esteemed as far as the English language extends. The New Bible is to read like the old, and the sacred associations con-nected with it are not to be dis-turbed; but within these limits all necessary and desirable corrections and improvements on which the best scholars are agreed will be introbetter; a clear and accute version able to quintne, not only because it doe clearer and more accurate; the oldest and purest text is to be followed; and invigorating action upon the entire errors, obscurities and inconsisten- system, cies are to be removed; uniformity in rendering Hebrew and Greek | generally. wards and proper names to be sought, in one word, the revision is to give, in idiomatle English, the nearest possible equivalent for the original word of God as it came

as King James' version was the best which could be made in the seventeenth century. MODE OF OPERATION. The English companies transmit, from time to time, confidential copies of their revision to the American companies; the American companies send the results of their laoors to the British companies, likewise in strict confidence. Then follows a second revision on the part of both committees, with a view to

possible in the nineteenth century.

harmonize the two revisions, and the results of the second revision are ransmitted in like manner. If any differences should remain after a final vote, they will be indicated in an appendix or preface. Happily, they will be few and unessential as compared with the large number of improvements already adopted by both committees

The work is not distributed among sub-committees, as was the case with the revisers of King James, but the whole Old Testament Com-United States government could pro-books of the Old Testament, the New Testament Company through those of the New, and in this way greater harmony and consistency will be secured than was possible under the other system.

When the revision is thoroughly

matured, it will be given to the public, as the joint work of both committees, by the University Presses of Oxford and Cambridge, which publish the best and cheapest editions of the Bible in England. and will insure the utmost accuracy in typography. When adopted by the churches and Bible societies of the two countries, the revised English bible will become public property, like King James' version. After they have finished their laoors the two committees will disband. It will then be for the churches and Bible societies to take run for 58 miles along the west side and 29 miles along the east side of the Nucces river, and their sale opens up for settlement one of the opens up for settlement one of the triangle of Western Texas. up the revision, and to decide whethfinest regions of Western Texas. old version, which is so deeply im-The proposed line of extension of bedded in our religious literature, will ever go entirely out of use, cer-
